Product Warranty

Allwin warrants that at the time of manufacturing, the products are prepared and tested in accordance with the highest standards. Due to biological differences in individuals, no product is 100% effective under all circumstances for all patients. Further, because we have no control of the condition under which the product is used, diagnosis of the patient, the method of use or administration & handling and storage of the product after it leaves our possession, we do not warrant any consequence which may arise about the final use of the device. The foregoing warranty is exclusive and instead of all other written, oral or implied warranties. No representative of **Allwin** may change any of the foregoing and the buyer accepts the product subject to all terms hereof.

Design Changes

Continuous improvements is the chosen path at **Allwin** and we reserve the right to change or discontinue any product without notice.

Return Goods Policy

Allwin will accept returned goods only after issuing a Return Goods Authorisation (RGA). The return request must provide a reason for return, invoice number and order number. Credit will be issued once the request is evaluated as per company rules. We will accept a return of the stock item within 30 days of the original invoice date. We will not accept the return of a nonstock, opened and damaged products. Returned stock items may be subject to a restocking fee.

Product testing

Allwin products are endotoxin tested with a limulus amebocyte lysate (LAL) assay unless otherwise noted. Our Ovum Pickup needles and Embryo Transfer catheters are batch tested for toxicity with a one-cell mouse embryo assay (MEA) and our Intra Uterine Insemination catheters are Human Sperm Survival Assay (HSSA) tested.

Storage of Products

Allwin recommends that products be stored in a cool and dry place. Plastic material used may degrade following extended periods of exposure to light and temperature.

ACE Single Lumen Ovum Pickup Needle

The ACE Single Lumen Ovum Pickup Needle is used for laparoscopic or ultrasound-guided transvaginal retrieval of oocytes from ovarian follicles.

- Echogenic tip
- Silicone bung for a tight fit
- Non-coring needle
- With luer lock connector
- Ergonomic handle
- 100 cm aspiration line

Tri-facet geometry
with a echogenic tip

Echogenic tip

ACE-FL Single Lumen Ovum Pickup Needle with Flushing Line

The ACE-FL Single Lumen Ovum Pickup Needle with Flushing Line is used for laparoscopic or ultrasound-guided transvaginal retrieval of oocytes from ovarian follicles.

- Aspiration and flushing line is made possible through a single channel
- Echogenic tip
- Silicone bung for a tight fit
- Non-coring needle
- With luer lock connector
- Ergonomic handle
- 100 cm aspiration line
- Multiple operation functionality by using stopcock valve

HYSTERO CATH Hysterosalpingography Catheter

The HYSTERO CATH Hysterosalpingography Catheter is used for injection of contrast media into the uterine cavity and fallopian tube(s) to evaluate the patency of the fallopian tubes.

- Strong low profile 7 Fr balloon
- Closed tip with side hole and open tip HSG catheter available
- Stopcock designed for locking the balloon channel and regulating the flow of contrast media.
- Stylet provided for added rigidity during the introduction
- 3 ml syringe included

Order No.	Description	Qty. / Box
HC-HSG7	HYSTERO CATH Hysterosalpingography Catheter	5
HC-HSG-O7	HYSTERO CATH Hysterosalpingography Catheter Open Taper Tip	5

*All products may not be available in all countries. Please contact our sales department for details.

Caution:

This product contains natural rubber latex which may cause allergic reaction in some individuals.

HYSTERO CATH SILICONE Hysterosalpingography Catheter

The HYSTERO CATH SILICONE Hysterosalpingography Catheter is used for injection of contrast media into the uterine cavity and fallopian tube(s) to evaluate the patency of the fallopian tubes.

- Strong low profile 7 Fr balloon
- Closed tip with side hole and open tip HSG catheter available
- Stopcock designed for locking the balloon channel and regulating the flow of contrast media.
- Stylet provided for added rigidity during the introduction
- 3 ml syringe included

Order No.	Description	Qty. / Box
HCSIL-HSG-7	HYSTERO CATH SILICONE Hysterosalpingography Catheter	5
HCSIL-HSG-O7	HYSTERO CATH SILICONE Hysterosalpingography Catheter Open Taper Tip	5

*All products may not be available in all countries. Please contact our sales department for details.

THE SAMPLER Endometrial Biopsy Catheter

THE SAMPLER Endometrial Biopsy Catheter is used for performing histological tissue biopsy and extracting samples of uterine menstrual content. Used for obtaining endometrial tissue.

- Centimetre marking provided on the catheter for precise placement
- Smooth rounded tip

SURESTRIP Vitrification Straws

The SURESTRIP Vitrification Straw is a cryopreservation storage device. It is used in the vitrification procedure to contain and maintain oocytes and embryos.

- High survival and development rates
- Secure coupling
- Marking on tip extreme for easy visibility under the microscope
- Adequate flat surface for writing
- Tip width ensuring placement of minimum solution
- 1 - cell MEA $\geq 80\%$ expand blastocysts within 96h
- Endotoxin LAL tested
- Sterility: SAL 10^{-6} - Gamma sterilized
- Vitrification of oocytes & embryos in all stages of development
- Available in 5 colours

Ring marking for easy
visualization during insertion

Transparent cap

Marking on tip for easy
visibility under microscope

Flat surface wide body
for writing

Strip width ensuring minimum
placement of solution

Colour	Pink	Red	Green	Blue	Yellow	Qty. / Box
Order No.	SUS-P	SUS-R	SUS-G	SUS-B	SUS-Y	10

*All products may not be available in all countries. Please contact our sales department for details.

SURESTRIP Vitrification Straws - Weighted

The SURESTRIP Vitrification Straws-Weighted is a cryopreservation storage device. It is used in the vitrification procedure to contain and maintain oocytes and embryos.

- Weighted balls prevents it from floating in nitrogen
- High survival and development rates
- Secure coupling
- Marking on tip extreme for easy visibility under the microscope
- Adequate flat surface for writing
- Tip width ensuring placement of minimum solution
- 1 - cell MEA \geq 80% expand blastocysts within 96h
- Endotoxin LAL tested
- Sterility: SAL 10^{-6} - Gamma sterilized
- Vitrification of oocytes & embryos in all stages of development
- Available in 5 colours

Colour	Pink	Red	Green	Blue	Yellow	Qty. / Box
Order No.	SUS-P-WT	SUS-R-WT	SUS-G-WT	SUS-B-WT	SUS-Y-WT	10

*All products may not be available in all countries. Please contact our sales department for details.

Weighted balls

SURESTRIP Vitrification Straws - Weighted Plug

The SURESTRIP Vitrification Straws - Weighted Plug is a cryopreservation storage device. It is used in the vitrification procedure to contain and maintain oocytes and embryos.

- High survival and development rates
- Secure coupling
- Marking on tip extreme for easy visibility under the microscope
- Adequate flat surface for writing
- Tip width ensuring placement of minimum solution
- Weight prevents it from floating in nitrogen
- 1 - cell MEA $\geq 80\%$ expand blastocysts within 96h
- Endotoxin LAL tested
- Sterility: SAL 10^{-6} - Gamma sterilized
- Vitrification of oocytes & embryos in all stages of development
- Available in 5 colours
- One goblet is filled with eight vitrification straws

Colour	Pink	Red	Green	Blue	Yellow	Qty. / Box
Order No.	SUS-P-WTP	SUS-R-WTP	SUS-G-WTP	SUS-B-WTP	SUS-Y-WTP	10

*All products may not be available in all countries. Please contact our sales department for details.

Weighted Plug

SURELOCK Vitrification Straws

The SURELOCK Vitrification Straw is a cryopreservation storage device. It is used in the vitrification procedure to contain and maintain oocytes and embryos.

- Concave tip for exact and secure placement of specimen under microscope
- Secure air tight coupling
- Semi-transparent body and cap
- The arrow on top surface ensuring orientation during use
- Easy visibility under microscope
- 1 - cell MEA $\geq 80\%$ expand blastocysts within 96h
- Endotoxin LAL tested
- Sterility: SAL 10^{-6} - Gamma sterilized
- Vitrification of 1-cell stage of embryos
- Available in 5 colours

Colour	Pink	Yellow	Green	Blue	Violet	Qty. / Box
Order No.	SUL-P	SUL-Y	SUL-G	SUL-B	SUL-V	10

*All products may not be available in all countries. Please contact our sales department for details.

D-TIP Denudation Pipettes

The Device is intended to be used for denudation i.e. to remove cumulus oocytes complexes from oocytes before procedure, "Intracytoplasmic Sperm Injection (ICSI)" and handling or manipulating of oocytes and embryos in Assisted reproduction technique (ART).

- Designed to adapt to surfaces with flexibility, lowering the risk of scratching or breaking
- Precisely engineered for delicate and accurate handling
- Different Color code for different sizes of pipette
- Endotoxin Tested (LAL test) 20EU/device
- Mouse Embryo Assay (MEA) ≥ 80%
- Gamma Sterilized

Order No.	Description	Colour	Qty/ Vial	Vial / Box
D-TIP 135µm	D-TIP Denudation Pipettes 135µm	Yellow	10	5
D-TIP 145µm	D-TIP Denudation Pipettes 145µm	White	10	5
D-TIP 155µm	D-TIP Denudation Pipettes 155µm	Purple	10	5

AspiPump 90D

- High vacuum, low flow pump capable of operating at normal vacuum levels ranging from -10mmHg to -300mmHg and boost vacuum levels from -300mmHg to -500mmHg, with adjustable vacuum settings in increments of -1mmHg.
- Red LED display for easy readability.
- Equipped with a dual foot pedal featuring color coding: Yellow for boost operation and blue for normal operation.
- The Aspi Suction Bottle with Connector (100ml), Aspi Suction Line with Luer Lock Connectors (200cm), and Aspi Hydrophobic Filter Set are provided sterile & intended for single use only.

Aspi Suction Bottle with Connector
